

SHRUTI BALIGERI

Tech Lead | Frontend Engineering (React & Angular)

Bangalore, KA | +91 93424 23493 | Shruti.m.baligeri@gmail.com | [linkedin.com/in/shrutibm](https://www.linkedin.com/in/shrutibm)

PROFESSIONAL SUMMARY

Tech Lead and Senior Frontend Engineer with 9+ years building and scaling enterprise web applications across React and Angular. Deep expertise in TypeScript, state management (NgRx, Redux, RxJS), and modular/micro-frontend architecture. Proven record leading teams of up to 5 engineers, cutting page-load times by up to 45%, and shipping production-grade fintech and maritime platforms in Agile environments. Hands-on with AI-assisted development workflows (Figma MCP and AI coding agents). Skilled in HLD/LLD design, code reviews, performance optimization, and mentoring developers toward high-quality, business-aligned delivery.

TECHNICAL SKILLS

Frameworks & Libraries: React, Redux, Angular (v2–v19), AngularJS, NgRx, RxJS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

UI & Styling: Angular Material, Bootstrap, Responsive Design, Component Libraries

Architecture & Practices: Modular & Micro-frontend Architecture, Lazy Loading, RBAC, State Management, HLD/LLD

Testing & Quality: Cypress, Robot Framework, Lighthouse, RUM, Code Reviews

Analytics & Monitoring: Mixpanel, Hotjar, Google Analytics, WebEngage

Tools & Methods: Git, Agile/Scrum, CI/CD workflows, MySQL Workbench

PROFESSIONAL EXPERIENCE

Tech Lead – Frontend Engineering

Mizzen Digital Technologies Pvt. Ltd. | Oct 2024 – Present

- Architected and developed a maritime Voyage Management System and Laytime Calculator using modular React and Angular architecture, streamlining vessel scheduling and demurrage calculations.
- Built a marine-specific interactive Map tool for vessel tracking and route visualization.
- Enabled AI-assisted development by integrating Figma MCP (Model Context Protocol) with an AI coding agent, converting design files directly into code and accelerating UI delivery by ~40%.
- Established shared component libraries across React and Angular, cutting new-feature delivery time by ~30%.
- Led and mentored a team of 5 engineers, introducing coding standards and review practices that reduced post-release defects by ~25%.
- Drove performance optimization (lazy loading, bundle splitting, change-detection tuning), improving average page-load time by up to 45%.
- Owned Agile delivery and production support across multiple releases, maintaining 99.9% application uptime.

Senior Software Engineer

Zbyte Technologies Pvt. Ltd. | May 2024 – Sep 2024

- Developed scalable Angular and React modules using modular architecture and reusable components.
- Implemented lazy loading and code-splitting strategies, reducing initial bundle size by ~35%.

- Collaborated with cross-functional Agile teams to deliver features on a 2-week sprint cadence.

Senior Software Engineer

Lendingkart Technologies Pvt. Ltd. | Feb 2017 – May 2024

- Led Angular version migrations across enterprise apps, reducing technical debt and improving maintainability by ~40%.
- Built enterprise dashboards with role-based access control (RBAC) serving 10,000+ internal and partner users.
- Implemented NgRx and Redux for predictable state management across large-scale React and Angular apps.
- Integrated 15+ third-party APIs and optimized rendering pipelines, improving Lighthouse performance scores from the 60s to 90+.
- Partnered with product and design teams using Mixpanel and Hotjar analytics to drive a measurable lift in user engagement.

KEY PROJECTS

- **Voyage Management System & Laytime Calculator (React / Angular):** Maritime platform for vessel scheduling, voyage tracking, and demurrage/laytime calculations.
- **Marine Map Tool (React / Angular):** Interactive, marine-specific map for vessel tracking and route visualization.
- **VMLite Dashboard (Angular):** Modular Angular architecture with RBAC and reusable component design.
- **Dedupe Dashboard (React):** React-based fraud-detection system with real-time duplicate-record matching.
- **Clarra Dashboard (Angular / RxJS):** Reactive communication module built with RxJS-driven data streams.
- **Customer Dashboard:** Responsive onboarding workflow optimized for mobile and desktop.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science

ACHIEVEMENTS

- Star Performer Award for outstanding contribution to enterprise project delivery.

ADDITIONAL INFORMATION

Core Strengths: Leadership, Teamwork, Critical Thinking, Time Management, Adaptability, Communication.
